Overview & Current Events

NextEra Energy (NEE) is an electric utility with two operating segments, Florida Power & Light (“FPL”) and NextEra Energy Resources (“NEER”). FPL is the largest U.S. electric utility by retail megawatt hour sales and customer numbers. The rate-regulated electric utility serves about 5.9 million customer accounts in Florida. NEER is the largest generator of wind and solar energy in the world. NEE was founded in 1925. NEE generates roughly 80% of its revenues from FPL. NextEra Energy reported its Q1 2024 financial results on 04/23/24. The utility started the year with solid bottom line results, and the stock has rebounded almost 14% to a more normalized valuation since our previous report in late January. For the quarter, the company reported revenues of \$5.7 billion (down 15% year over year), translating to adjusted earnings of \$1.9 billion (up 12% year over year). On a per-share basis, adjusted earnings climbed 8.3% to \$0.91. FPL commissioned about 1,640 MW of cost-effective rate base solar projects, while NEER added about 2,765 MW worth of new renewables and storage projects, bringing its backlog to roughly 21.5 GW. Management maintained its 2024 adjusted EPS guidance range at \$3.23-\$3.43. So, we also maintain the midpoint of \$3.33 for our 2024 EPS estimate. The utility raised its quarterly dividend by 10% to \$0.515 per share, resulting in an annual payout of \$2.06.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$5.60	\$6.06	\$5.78	\$6.70	\$7.70	\$8.37	\$2.31	\$2.55	\$2.90	\$3.17	\$3.33	\$4.67
DPS	\$2.90	\$3.08	\$3.48	\$3.93	\$4.44	\$5.00	\$1.40	\$1.54	\$1.70	\$1.87	\$2.06	\$2.96
Shares¹	443	461	468	471	477	491	1,972	1,975	1,993	2,054	2,055	2,198

The stock had a 4:1 stock split in October 2020. This is why its EPS appears to be much lower in 2020 in the table above. We also adjusted its 2020 dividend-per-share (DPS) accordingly. Although there were some years where profits declined sequentially, as they did between 2015 and 2016, NextEra Energy’s EPS rose relatively consistently during the last decade. NextEra Energy’s earnings did not take a significant hit during the last financial crisis, as EPS dropped by just 2% between 2008 and 2009. Between 2014 and 2023, NextEra Energy grew its EPS by 9.5% a year. The company’s future growth will be generated through organic investments and acquisitions. For example, there was NEE’s acquisition of Gulf Power in January 2019, and it also acquired GridLiance in Q1 2021 to expand its rate-regulated/long-term contracted business. NEER commissioned ~5.6 GW of renewable and storage projects in 2023. At the end of 2023, its backlog stood at ~20 GW. Its renewable projects should drive the segment’s profits going forward. NEE forecasts that its adjusted EPS will rise by about 6.4% a year through 2026. We use an EPS growth rate of 7.0% and estimate a dividend growth rate of 7.5% through 2029, believing that if interest rates decrease somewhat, the growth rate can improve.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	17.3	16.9	20.7	23.3	22.6	25.7	30	32.7	29.2	22.7	20.0	21.0
Avg. Yld.	3.0%	3.0%	2.9%	2.8%	2.6%	2.3%	2.3%	1.9%	2.0%	2.7%	3.1%	3.0%

Until 2023, NextEra Energy's valuation had risen persistently over the past ten years. We expect NEE to continue with a good growth rate but slower than in the last decade. We think a multiple of about 21 is fair given the current higher interest rate environment. The stock appears to be fairly valued based on our estimated EPS for 2024.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	52%	51%	60%	59%	58%	60%	61%	60%	59%	59%	62%	63%

NextEra Energy has established a compelling dividend growth track record over the last decade. This was possible due to earnings growth and a rising payout ratio. In February, NEE increased its dividend 10%, but its EPS is expected to grow more slowly. This trend can't continue forever. Eventually, it'll need to align dividend growth with earnings growth if not have dividend growth slower than earnings growth to provide better safety for the dividend. Currently, the dividend is safe as NEE earns stable profits and maintains a sustainable payout ratio. Because of the regulations that are levied upon utilities, there are fewer competitive risks. As one of the biggest utilities in the United States, NEE also benefits from massive scale, which serves as a competitive advantage. Its focus on higher-growth renewable energy projects will allow NextEra Energy to continue growing faster than its peers. Utilities have low cyclicality, which is why economic downturns will do little harm (if at all) to NextEra Energy's bottom line.

Final Thoughts & Recommendation

NextEra Energy looks more attractive than many of its peers in terms of its earnings growth track record, its earnings growth outlook, its dividend growth projections, and the strength of its renewable portfolio. We estimate a rate of return of 10.8% from a dividend yield of 3.1%, 7.0% EPS growth, and 1.0% from P/E expansion. Sure Dividend rates NEE as a Buy, especially on meaningful dips.
