Overview & Current Events

Analog Devices (ADI) makes integrated circuits that are sold to OEMs (original equipment manufacturers) to be incorporated into equipment and systems for communications, computer, instrumentation, industrial, military/aerospace, and consumer electronics applications. ADI was founded in 1965 and is a \$115 billion market cap company that's been increasing dividend payments to shareholders for 20 consecutive years.

While Analog Devices might seem like a legacy company because it earns about 50% of its revenues from products that it's been selling for 10 years or more, the business is also changing to meet the needs of new markets with its \$10 billion investment in Research and Development over the past 10 years, and their previous acquisitions of companies like Maxim Integrated, Linear Technology, and Hittite.

On February 20th, 2024, Analog Devices announced a 7% dividend increase to \$0.92 per share quarterly.

On May 22nd, 2024, Analog Devices reported second quarter 2024 results for the period ending May 4th, 2024. For the quarter, the company reported revenue of \$2.16 billion, down 34% compared to the prior year's quarter, which beat analysts' estimates by \$50 million. The company saw adjusted earnings-per-share of \$1.40, which also beat analysts' estimates by 13 cents but represented a 51% decline in EPS compared to the year-ago quarter.

During the quarter, Analog Devices repurchased \$222 million of its shares, and paid \$456 million in dividends.

Management forecasts Analog Devices will generate revenue of \$2.27 billion in fiscal Q3 2024 with adjusted operating margins of roughly 20%, and adjusted EPS of about \$1.50.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.40	\$3.16	\$3.07	\$4.68	\$5.95	\$5.14	\$4.91	\$6.46	\$9.57	\$10.09	\$6.20	\$13.59
DPS	\$1.48	\$1.60	\$1.68	\$1.80	\$1.92	\$2.16	\$2.48	\$2.76	\$2.97	\$3.34	\$3.68	\$5.66
Shares	311.0	312.0	308.0	369.0	370.0	368.0	369.0	525.0	515.0	500.0	495.0	480.0

Over the past five and nine years, Analog Devices has grown earnings-per-share at an average rate of 11.1% and 17.3% annually, respectively. The business is targeting a long term annual revenue growth rate of 7% to 10%, as the company continues to build on its leading markets and benefits from secular trends like Industry 4.0, which is implementing machine learning into factory production, data centers, and augmented and virtual reality.

Analog sees growth coming from Industry 4.0 trends in its industrial segment, and growth in the EV market for its automotive segment. The share count grew in 2021 due to Analog's acquisition of Maxim Integrated, a designer and manufacturer of integrated circuits. We expect that Analog Devices will see about \$6.20 in adjusted earnings-per-share for the fiscal year 2024. Over the intermediate term, we expect earnings per share to grow at 17% annually, guiding our 2029 earnings-per-share estimate of \$13.59.

Over the past five and nine years, Analog Devices has seen dividends grow at 9.8% and 8.0% annually. Currently, Analog Devices pays a quarterly dividend of \$0.92, which is \$3.68 annualized. Over the intermediate term, we expect the dividend per share to increase by 9% annually, which guides our 2029 dividend estimate of \$5.66.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	21.2	18.6	18.9	16.8	15.5	20.3	23.1	24.5	16.8	18.0	37.5	21.0
Avg. Yld.	2.9%	2.7%	2.9%	2.3%	2.1%	2.1%	2.2%	1.5%	1.9%	1.9%	1.6%	2.0%

Over the past five and nine years, Analog Devices has averaged a P/E ratio of 20.5 and 19.4, respectively. The stock currently trades at a P/E ratio of 37.5, which is significantly higher than its historical average. We peg fair value at 21.0 times earnings, implying the potential for a meaningful valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	62%	51%	55%	38%	32%	42%	51%	43%	31%	33%	59%	42%

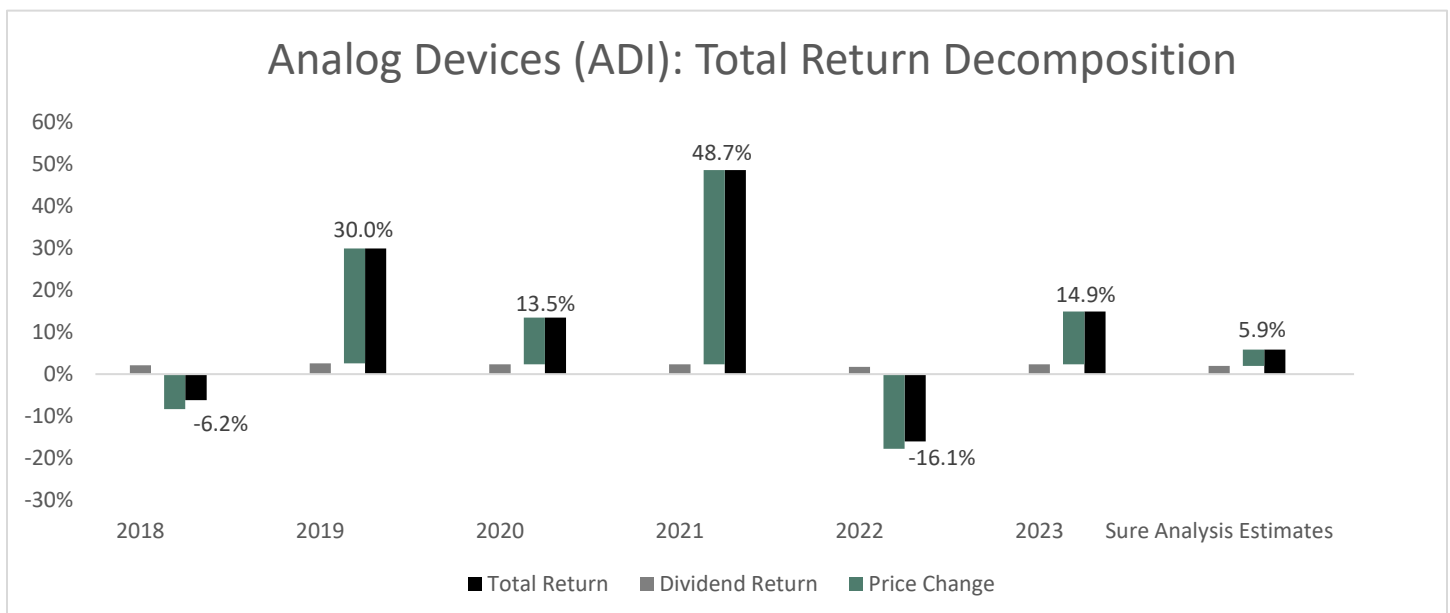

Analog has a competitive advantage in the Integrated Circuit market, where the company's scale allows it to compete against companies like Texas Instruments (TXN), Broadcom (AVGO) and Monolithic Power Systems (MPWR).

Companies should be able to withstand periods of economic hardship, and it's important that they have strong liquidity and solvency ratios. Analog Devices has conservative debt ratios, and as of second quarter FY 2024, its leverage ratio was 1.1X. As a result, the company is currently under no great pressure to reduce its debt. While the dividend payout ratio of 59% is somewhat elevated for Analog, strong EPS growth ahead should clear the way for a lower payout over the next five years, enabling the company to continue boosting its dividend growth streak.

Final Thoughts & Recommendation

Shares of Analog Devices have the potential to be a solid investment over the intermediate term. Total return prospects come in at 5.9% annually over the next five years based on the combination of 17% EPS growth, a 1.6% dividend yield and a negative impact from the valuation rerating downwards. This security may be particularly attractive for dividend growth investors as the stock offers a reliable dividend which has grown by double digits in the last five years, and grown for two decades. The stock earns a hold rating.
