## Overview & Current Events

Franklin Resources, founded in 1947 and headquartered in San Mateo, CA, is a global asset manager with a long and successful history. The company offers investment management (which makes up the bulk of fees the company collects) and related services to its customers, including sales, distribution, and shareholder servicing. As of March 31<sup>st</sup>, 2024, assets under management (AUM) totaled \$1.645 trillion for the \$12 billion market cap company.

On July 31<sup>st</sup>, 2020, Franklin Resources acquired Legg Mason (previous ticker LM) for \$4.5 billion in cash, to go along with the assumption of \$2 billion in debt.

On December 12<sup>th</sup>, 2023, Franklin Resources announced a \$0.31 quarterly dividend, marking a 3.3% year-over-year increase and the company's 44<sup>th</sup> consecutive year of increasing its payment.

On April 29<sup>th</sup>, 2024, Franklin Resources reported second quarter 2024 results for the period ending March 31<sup>st</sup>, 2024. (Franklin Resources' fiscal year ends September 30<sup>th</sup>.) Total assets under management equaled \$1.645 trillion, up \$189.2 billion compared to last quarter, as a result of \$148.3 billion from the Putnam Investments acquisition, \$38.8 billion of net market change, distributions, and other, and \$6.9 billion of long-term net inflows, partly offset by \$4.8 billion of cash management net outflows.

For the quarter, operating revenue totaled \$2.153 billion, up 12% year-over-year. On an adjusted basis, net income equaled \$307 million or \$0.56 per share compared to \$317 million or \$0.61 per share in Q2 2023. During Q2, Franklin repurchased 0.4 million shares of stock for \$11.7 million. Franklin ended the quarter with \$5.7 billion in cash and investments.

## Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
<b>EPS</b>	\$3.79	\$3.29	\$2.94	\$3.01	\$3.38	\$2.62	\$2.61	\$3.74	\$3.63	\$3.63	<b>\$2.46</b>	<b>\$3.14</b>
<b>DPS</b>	\$0.46	\$0.57	\$0.69	\$0.78	\$0.89	\$1.01	\$1.07	\$1.11	\$1.16	\$1.20	<b>\$1.24</b>	<b>\$1.51</b>
<b>Shares<sup>2</sup></b>	623	604	570	555	519	499	492	491	488	488	<b>520</b>	<b>495</b>

During the 2007 - 2018 period, Franklin Resources grew earnings-per-share by a compound rate of 3.3% per annum. 2019 and 2020 were down years, but the company got back on track in fiscal 2021. The biggest growth segment in the asset management industry is ETFs, which have much lower expense ratios than actively managed funds. Franklin's actively managed funds have performed well, which serves as an advantage versus other active asset managers; however, low-cost passive funds are the true competition. The "race to the bottom" as it relates to fees is good for investors but not asset managers. If Franklin Resources must keep lowering its management fees, stable AUM will still lead to declining net income, all else equal. A counterpoint to this notion is that Franklin Resources has been acquiring alternative AUM through purchases such as Legg Mason, Lexington Partners, and Alcentra. It also closed its acquisition of Putnam Investments on January 1, 2024. At the time, Putnam had \$148 billion in AUM. While this does not change

Updated April 30<sup>th</sup>, 2024 by Quinn Mohammed

the company's long-term problem, there are opportunities available in the way of synergies and complementary product offerings. We expect 5.0% annual growth over the intermediate term off the low base for FY 2024.

## Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	14.4	15.4	12.4	13.7	11.1	12.6	8.1	7.9	8.9	14.1	9.3	9.0
Avg. Yld.	0.8%	1.1%	1.9%	1.9%	2.4%	3.2%	5.0%	3.9%	4.2%	4.5%	5.4%	5.3%

Over the past decade shares of Franklin Resources have traded with an average P/E ratio of 11.9 times earnings. We are using 9.0 times earnings as our baseline, as asset managers are facing substantial headwinds in the way of falling asset management fees. With shares trading at 9.3 times estimated earnings, this implies a valuation headwind.

The dividend is also worth mentioning. Not only is the 5.4% starting yield well covered, but Franklin Resources also has a tendency to periodically pay out a special dividend. While we have not included this in our forecast, investors could receive a yield in excess of the stated payout, although the company must first digest its acquisitions.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	12%	17%	23%	26%	26%	39%	41%	30%	32%	33%	50%	48%

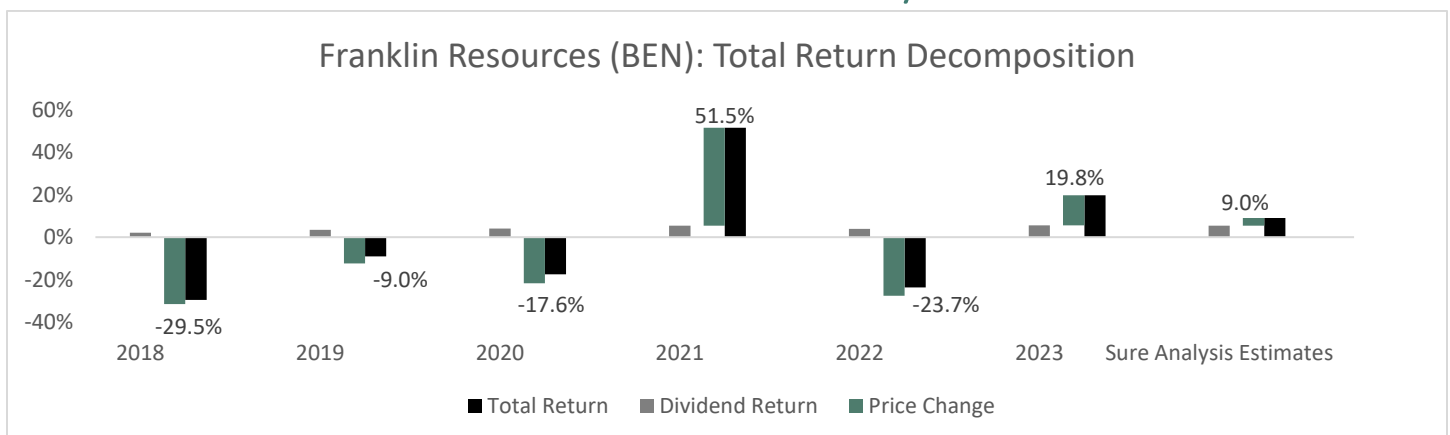

Franklin Resources' funds have performed well over the long term, but we do not believe the company has a meaningful competitive advantage in its field. Indeed, Franklin Resources needs to adapt to the trend towards low-cost passive ETFs to remain competitive. Unless a novel solution is found, this could mean a difficult road in the years to come.

The dividend payout ratio has never been especially high, which has allowed the company to retire a meaningful number of shares and pay the occasional special dividend. Lately the payout ratio has inched upward, but the dividend is still well covered.

## Final Thoughts & Recommendation

Shares are down 12% in the last one year period, which compares unfavorably to the broader market, which has increased by nearly 22%. Franklin Resources is a classic asset manager that must battle the rise of low-cost investing, which has been responsible for customers moving money from actively managed funds to ETFs. The company is in an interesting situation where the core business is declining, but the financial foundation – allowing for share repurchases, solid payouts and acquisitions – has been solid. Total return potential comes in at 9.0% per annum, stemming from 5.0% growth and a 5.4% dividend yield, partly offset by a valuation headwind. We are reiterating our hold rating.
