Overview & Current Events

New York Mortgage Trust is a real estate investment trust, or REIT, that acquires, invests in, finances, and manages mortgage-related assets and other financial assets. The trust doesn't own physical real estate, but rather seeks to manage a portfolio of investments that are real estate related. New York Mortgage Trust derives revenue from net interest income and net realized capital gains from its investment portfolio. The trust primarily seeks to generate interest income from mortgage-related assets, but it also owns some distressed financial assets where it seeks to capture capital gains. The trust invests in residential mortgage loans, multi-family CMBS, preferred equity, and joint venture equity. It has been publicly traded since 2004 and has a current market capitalization of \$535 million. The trust underwent a 1-for-4 reverse stock split in 2023; our tables reflect this change.

New York Mortgage Trust posted first quarter earnings on May 1st, 2024, and results were quite weak. Earnings-per-share came to a loss of 75 cents, which was a staggering 89 cents off from expectations. Revenue was essentially flat at \$17.9 million, but missed by almost \$5 million.

The trust's average earning assets yield is now just 6.38%, meaning the trust is struggling to even cover its cost of capital, which is crimping its ability to generate earnings. Indeed, net interest spread was just 1.31% in the first quarter given moves in market interest rates.

Adjusted book value per share ended the quarter at \$11.51, which is well ahead of the share price. However, the economic return on adjusted book value was once again negative at -7.5%, as the trust continues to destroy value for shareholders much more often than it creates value.

We've left our earnings power number at 80 cents per share, but note NYMT is expected to post a sizable loss again this year.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$1.52	\$0.62	\$0.50	\$0.61	\$0.58	\$0.65	-\$0.89	\$0.37	-\$0.90	(\$0.99)	\$0.80	\$0.80
DPS	\$1.08	\$1.02	\$0.96	\$0.80	\$0.80	\$0.80	\$0.23	\$0.40	\$0.40	\$1.20	\$0.80	\$0.80
Shares²	22	27	28	33	37	61	94	95	91	91	91	91

New York Mortgage Trust has struggled to grow consistently in the past, a trait owed to the very volatile nature of the markets it invests in. Prices and yields of mortgage-backed securities tend to move around a lot, and with rates in a state of inversion, the past few years have not been kind to mortgage REITs.

We forecast no growth for New York Mortgage Trust in the coming years. Interest rates are sharply higher than they have been in recent years. However, we see rate volatility as a potential headwind for NYMT and its competitors in months to come. Rates are up recently, but volatility in rates has hampered results for mREITs. In addition, the trust's strategy of sacrificing short-term earnings to lower its cost of capital supports this environment being tougher.

New York Mortgage Trust, Inc. (NYMT)

Updated May 31st, 2024, by Josh Arnold

The dividend was raised too quickly in 2023 and was cut once again. We think the trust will struggle to grow EPS over time, meaning the dividend payment could remain stagnant for some time, or even be at further risk of another cut.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	5.0	11.4	11.4	10.4	10.5	9.5	---	11.6	---	---	7.3	6.0
Avg. Yld.	14.1%	14.5%	16.8%	12.7%	13.2%	13.0%	7.0%	9.3%	15.6%	14.1%	13.6%	16.7%

The price investors have been willing to pay for this stock has moved around enormously in the past decade, ranging from 5 times earnings to more than 11. Given the current environment, we assess fair value at 6 times earnings, which is below the current multiple of 7.3. That means we forecast a big headwind from the valuation in the coming years, with the yield slated to rise due to a lower valuation driving a lower share price.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	71%	165%	192%	131%	138%	123%	---	108%	---	---	100%	100%

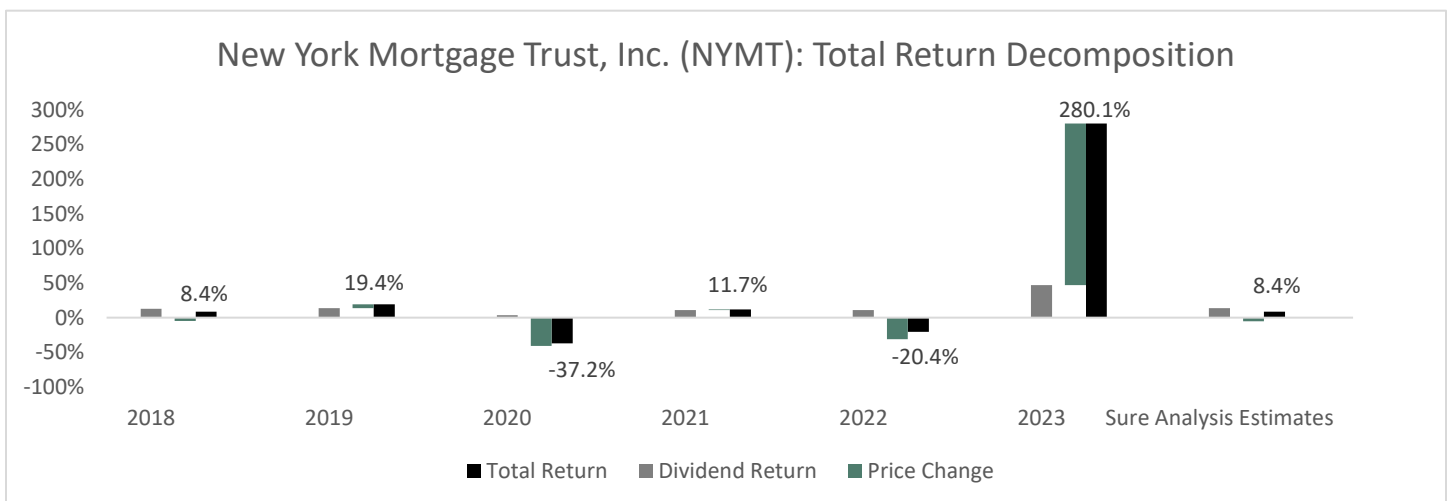

New York Mortgage Trust does not have competitive advantages as all mortgage REITs operate in largely the same way, and with the same sort of securities. It used to have some scale advantages, but with the sales that occurred early in 2020, that is no longer the case.

The balance sheet is in much better shape after the capital raises and asset sales that occurred in early 2020, but recession performance is generally poor for mortgage REITs as consumers and businesses default on their mortgages in higher numbers during economic downturns. The trust has increased its recession exposure with its strategy of buying individual loans rather than MBS.

Final Thoughts & Recommendation

New York Mortgage Trust, and indeed the mortgage REIT industry, are at a tough point in the cycle. Volatility in earnings is likely to increase given the strategy shift, and the dividend remains very stretched. New York Mortgage Trust continues to be a very volatile way to collect a dividend payment. With total return expectations of 8.4%, we are reiterating the stock at a hold rating. The yield is above 13%, but the valuation is a headwind, and we note the dividend is at serious risk of another cut. This is an extremely speculative stock.
