Overview & Current Events

Evergy is an electric utility holding company incorporated in 2017 and headquartered in Kansas City, Missouri. Through its subsidiaries Evergy Kansas, Evergy Metro and Evergy Missouri West, the company serves approximately 1.4 million residential customers, nearly 200,000 commercial customers and 6,900 industrial customers and municipalities in Kansas and Missouri. Evergy has a market capitalization of \$13.4 billion and is significantly impacted by seasonality, as about one-third of its retail revenues is recorded in the third quarter.

In early August, Evergy reported (8/9/24) financial results for the second quarter of fiscal 2024. The company benefited from warmer-than-normal weather, rate hikes and higher transmission margin, partly offset by higher interest expense, operating & maintenance costs and depreciation. As a result, its adjusted earnings-per-share grew 11% over the prior year's quarter, from \$0.81 to \$0.90, and beat the analysts' consensus by \$0.01.

The business outlook of Evergy is positive, as the utility has proved resilient to high interest rates and high inflation. Due to unfavorable weather in the greater part of 2023, Evergy incurred a -5% decrease in earnings-per-share last year, but it reaffirmed its positive guidance for 2024. It expects adjusted earnings-per-share of \$3.73-\$3.93 and reiterated its long-term guidance for 4%-6% adjusted earnings-per-share growth off the original guidance of \$3.65 in 2023.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.35	\$2.09	\$2.43	\$2.27	\$2.50	\$2.89	\$3.10	\$3.54	\$3.71	\$3.54	\$3.83	\$4.89
DPS	\$1.40	\$1.44	\$1.52	\$1.60	\$1.74	\$1.93	\$2.05	\$2.18	\$2.33	\$2.48	\$2.57	\$3.28
Shares ¹	132.8	139.3	142.5	142.6	214.1	239.9	227.5	230.3	230.6	230.5	231.0	230.0

Evergy has grown its earnings-per-share at a 4.7% average annual rate over the last decade. This mid-single digit growth rate is typical in the utility sector. However, Evergy has enhanced its investments in growth projects lately and hence it is likely to accelerate its growth pattern in the upcoming years. The company expects to spend \$12.5 billion on capital expenses in 2024-2028 while it will also reduce its operational and maintenance expenses. It has reduced these expenses by -18% since 2018 and expects to reduce them by another -8% until the end of this year. Given also expected regulatory approval of 6% annual growth in rates until 2028, Evergy expects to grow its earnings-per-share by 4%-6% per year until at least 2026. The utility also expects to grow its dividend in line with its earnings-per-share, at a 4%-6% annual rate, and maintain a dividend payout ratio of 60%-70% until at least 2026. We expect 5.0% average annual growth of earnings-per-share over the next five years.

Valuation Analysis

Evergy Inc. (EVRG)

Updated August 23rd, 2024 by Aristofanis Papadatos

The surge of interest rates to a 23-year high exerts pressure on the valuation of utilities, as investors can find decent yields elsewhere. As a result, Evergy is currently trading at a nearly 10-year low price-to-earnings ratio of 15.1, which is much lower than its historical 5-year average of 18.2. If Evergy trades at its 5-year average valuation level in five years, it will enjoy a 3.7% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	60%	69%	63%	70%	70%	67%	66%	62%	63%	70%	67%	67%

The subsidiaries of Evergy operate on a fully regulated retail utility model in Missouri and Kansas and thus they do not face any competition in these markets. This typical utility model, which generates reliable and growing earnings, is undoubtedly a strong competitive advantage.

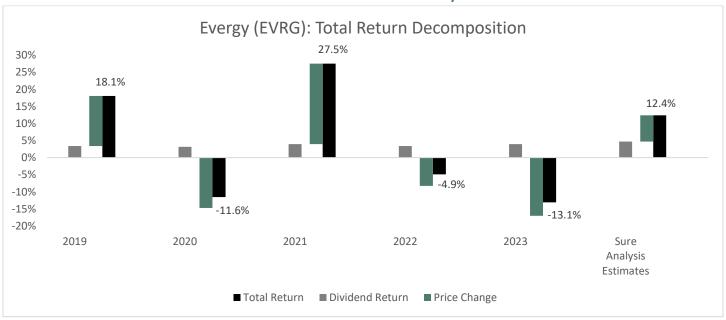

Another major advantage of utilities is their resilience to recessions. Even during the fiercest recessions, people do not cut electricity consumption. In fact, they spend more time at home and thus they increase their consumption. In the severe recession, which was caused by the pandemic, Evergy grew its adjusted earnings-per-share 7% in 2020, to an all-time high level. Moreover, thanks to its 4.4% dividend, its reasonable payout ratio of 67% and its expected dividend growth rate of 4%-6% per year until at least 2026, Evergy is a great candidate for income-oriented investors.

The only material risk factor for Evergy is an environment of higher interest rates. Treasury yields have surged in the last two years due to high inflation and the resultant interest rate hikes implemented by the Fed. If bond yields rise significantly from current levels, which is unlikely, they will render the dividend yield of Evergy less attractive and hence they will exert pressure on its stock price.

Final Thoughts & Recommendation

Evergy has proved resilient to the pandemic and the highly inflationary environment prevailing now and has promising growth prospects ahead. It is also trading with an exceptionally cheap valuation, which is likely to highly reward investors whenever interest rates moderate. Evergy has rallied 12% this year but it could still offer a 12.4% average annual return over the next five years thanks to 5.0% earnings-per-share growth, its 4.4% dividend and a 3.7% annualized valuation tailwind. It thus maintains its buy rating.

Total Return Breakdown by Year
