Overview & Current Events

Intuit is a cloud-based accounting and tax preparation software giant, headquartered in Mountain View, California. Its products provide financial management, compliance, and services for consumers, small businesses, self-employed workers, and accounting professionals worldwide. Its most popular platforms include QuickBooks, TurboTax, Mint, and TSheets. Cumulatively they serve more than 100 million customers. The \$173.3 billion company recorded \$16.3 billion in revenues last year and is headquartered in Mountain View, California.

On August 22nd, 2024, Intuit raised its dividend by 16% to a quarterly rate of \$1.04. On the same day, Intuit reported its Q4 and full-year results for the period ending July 31st, 2024. Intuit published another robust quarter, growing its “Small business and Self-employed” revenue by 20% and its online ecosystem revenue by 18%. QuickBooks Online accounting revenues grew 17% year-over-year as well. Total revenues for the quarter reached \$3.18 billion, up 17% year-over-year.

Adjusted EPS for the quarter grew by 21% to \$1.99 compared to FQ4 2023. For the year, adjusted EPS came in at \$16.94, up 18% compared to the previous year. Management remains focused on its innovation-driven AI strategy and its 5 Big Bets, including revolutionizing speed-to-benefit, connecting people to experts, unlocking smart money decisions, being the center of small business growth, and disrupting the small business mid-market.

Management introduced its revenue and non-GAAP EPS guidance for FY2025. Revenues are expected to be in a range of \$18.160 billion to \$18.347 billion, implying a growth rate between 12% and 13% from last year. Adjusted EPS is expected to be between \$19.16 and \$19.36. This implies a year-over-year growth of 18% to 19%. We have applied the midpoint of this range in our estimates.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.30	\$3.74	\$3.83	\$5.19	\$5.99	\$6.92	\$9.74	\$11.85	\$14.40	\$16.94	\$19.26	\$35.49
DPS	\$1.00	\$1.20	\$1.36	\$1.56	\$1.88	\$2.12	\$2.36	\$2.72	\$3.12	\$3.60	\$4.16	\$7.66
Shares¹	281	262	257	256	260	261	270	280	281	280	280	260

EPS CAGR over the past decade has been about 18%, while DPS CAGR has been about 15% during the period. Consistent earnings growth has resulted from multiple acquisitions that have allowed the company to expand its portfolio of products. We forecast EPS and DPS growth of around 13% through 2029 to reflect Intuit’s strong momentum while assuming some degree of deceleration ahead. Overall, Intuit’s resilient revenues should continue to grow gradually due to its non-stop acquisitions, which can help earnings growth amid unlocking efficiencies over time.

Our estimates might be quite prudent, and actual results are likely to be stronger. This has been the case in every single report since initiating coverage on INTU. Still, we remain conservative against a potential deceleration and unforeseen headwinds.

In both FY2023 and FY2024, Intuit repurchased \$2.0 billion in stock each year. Following the company's Q4 and FY2024 results, the board approved a further \$3.0 billion repurchase authorization, raising the total authorization to \$4.9 billion.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	29.5	58.2	45.3	39	47.1	48.7	44.5	39.6	29.4	32.2	32.2	28.0
Avg. Yld.	0.9%	1.3%	1.2%	1.1%	0.8%	0.8%	0.6%	0.6%	0.7%	0.7%	0.7%	0.8%

Intuit's valuation has traded at rich premiums in recent years, as the company has dominated the tax-reporting software market. With its growth remaining robust, the stock currently trades at a P/E ratio of 32.2. Due to Intuit's fantastic moat, recession proof business model, and explosive growth, we can see the premium valuation lasting longer than expected before eventually compressing. To be prudent, however, we retain our medium-term fair P/E multiple at a more modest 28. The dividend yield should remain relatively low, despite its rapid growth and the moderate payout ratio. We expect investors to enjoy total returns mainly from share price appreciation, powered by EPS growth and share buybacks.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	77%	32%	36%	30%	31%	31%	24%	23%	22%	21%	22%	22%

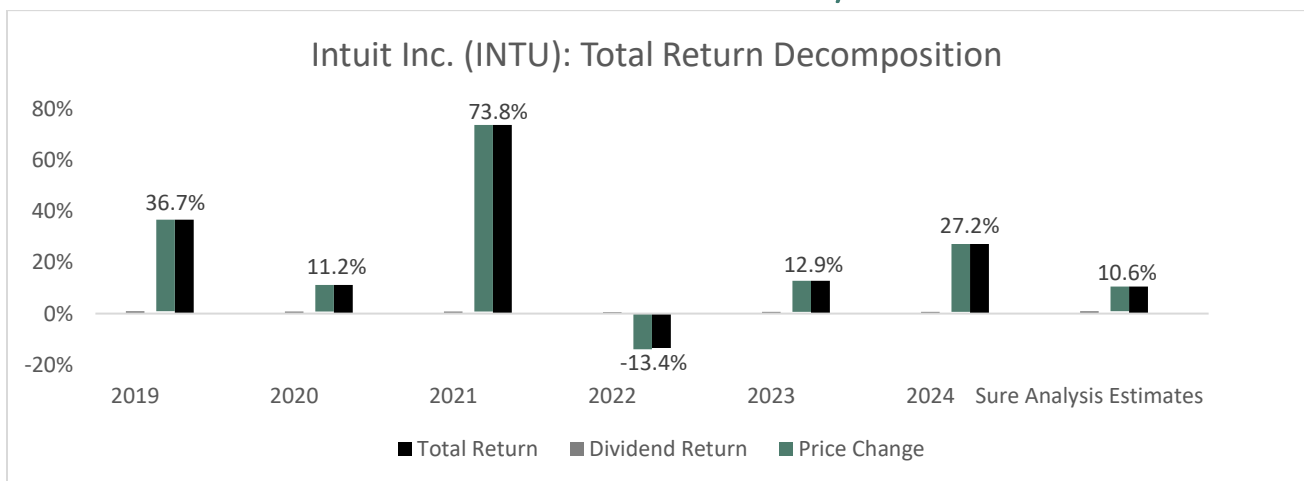

Intuit makes for a relatively trustworthy investment, as its revenues are primarily recession-proof, as proven by the robust sales growth despite the challenges resulting from COVID-19. While nothing is certain in life, it is safe to say that taxes won't be disappearing. The company has dominated its industry, closing more than 46 acquisitions over the past few years. With non-meaningful levels of worrying competition, its suite of products will be there to help people pay their inevitable taxes, while the company enjoys a recurring stream of revenues.

To highlight its sales resilience, even in the midst of the 2007 to 2009 financial crisis, the company managed to grow earnings by around 7%. We consider Intuit to be an incredible sector-leader, while its future acquisitions should further strengthen its portfolio of products, hence its rich valuation. The stock's dividend remains very safe, reflecting only around 22% of the company's adjusted net income.

Final Thoughts & Recommendation

Intuit ended FY2024 with strong momentum, while management's guidance points to another exciting year ahead. We forecast annualized returns of around 10.6% through 2030, driven primarily by our growth estimates, which, however, may be partially offset by valuation headwinds. With a low yield, the stock may not appeal to income investors. That said, given the strong dividend hikes, Intuit stock could end up being a moderate source of income in later years. We rate shares as a buy due to projected returns.
