## Overview & Current Events

Oaktree Specialty Lending Corp. is a specialty finance company, or BDC. It provides lending services and invests in small and mid-sized companies. The company's investment objective is to maximize its portfolio's total return by generating current income from debt investments, and to a lesser extent, capital appreciation from equity investments. Its investments generally range in size from \$10 million to \$100 million and are principally in the form of the first lien, second lien, or collectively, senior secured, and subordinated debt investments, which may also include an equity component made in connection with investments by private equity sponsors. As of June 30<sup>th</sup>, 2024, the investment portfolio accounted for \$3.1 billion at fair value, diversified across 158 portfolio companies, with a focus on Application Software (16.4% of the portfolio), Multi-Sector Holdings (6.6%), and Biotechnology (4.1%). The company was founded in 1995, has over 1,200 employees, and is headquartered in Los Angeles, California.

On August 1<sup>st</sup>, 2024, Oaktree Specialty Lending Corp. released its third quarter of fiscal 2024 results for the period ending June 30<sup>th</sup>, 2024. For the quarter, the company reported adjusted net investment income (NII) of \$45.2 million or \$0.55 per share, as compared with \$44.7 million, or \$0.56 per share, in the second quarter of fiscal 2024.

The increase in earnings was primarily driven by lower Part I incentive fees, partially offset by a decrease in adjusted total investment income. The weighted average yield on new debt investments was 11.1%, consistent with the second quarter of fiscal 2024. Total debt outstanding was \$1,740 million by the end of the reporting quarter, with a total debt to equity ratio of 1.16x and a net debt to equity ratio of 1.10x, after adjusting for cash and cash equivalents. New debt investment originations totaled \$338.7 million during the quarter. The debt-to-equity ratios indicate a conservative capital structure, maintaining financial flexibility.

Management expresses confidence in the company's strategic positioning and its ability to navigate current market conditions. They remain focused on generating strong returns for shareholders, underscored by the previously announced reduction in the base management fee from 1.50% to 1.00% of assets, aiming to enhance shareholder value over the long term. However, guidance for the full year was not provided.

The company has a net investment income growth rate of 0.5% per year over the past decade and 35% over the past five years. We expect net investment income to increase by 10% per year for the next five years. The company has been able to increase its yearly dividend payout for 4 consecutive years. Over the last five years, the average annual dividend growth rate is 14.1%. In February 2023, the company increased its quarterly dividend by 1.9% from \$0.54 to \$0.55 per

share. In addition to the quarterly dividend, a special cash distribution of \$0.07 per share was declared, payable in cash in December 2023.

## Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
<b>Avg. P/E</b>	12.2	73.4	--	--	14.8	5.7	17.0	4.3	44.8	16.0	<b>7.6</b>	<b>10.0</b>
<b>Avg. Yld.</b>	1.9%	10.7%	13.0%	9.2%	8.2%	7.6%	8.2%	8.2%	9.1%	10.0%	<b>12.9%</b>	<b>8.2%</b>

During the past decade shares of Oaktree have traded with an average valuation of about 23.5 times earnings and today, it stands at 7.6. We are using 10.0 times earnings as a fair value baseline, implying the potential for a valuation tailwind. The company's dividend yield is currently 12.9% which is above the average yield over the past decade of 9.5%. Both figures imply that the stock is somewhat undervalued.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
<b>Payout</b>	127%	787%	304%	275%	279%	233%	229%	239%	275%	89%	<b>99%</b>	<b>82%</b>

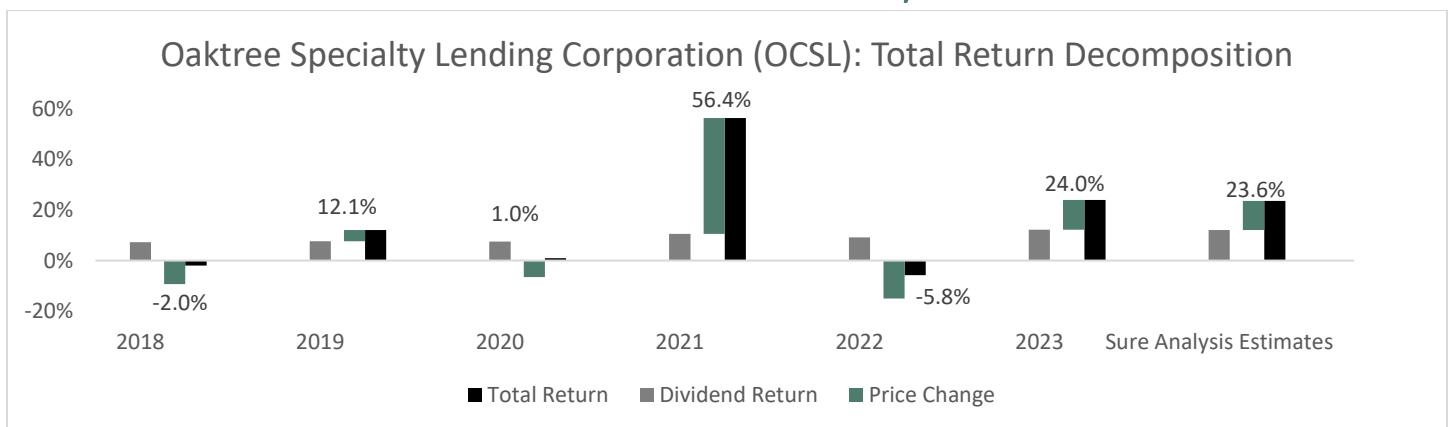

Over the past five years, the company's dividend payout ratio has averaged above 200%. Currently, Oaktree's dividend could be considered somewhat safer since the quarterly adjusted net investment income of \$0.55 covered the quarterly dividend payment of \$0.55. Management believes that it has been very conservative in its approach to dividends.

Oaktree's business model centers around investing in various debt instruments, such as senior secured loans, subordinated loans, and mezzanine loans. The company primarily generates revenue through interest income earned on its loan investments. It may also earn revenue from fees charged for structuring and arranging financing transactions and from dividends received from equity investments. Oaktree's management has a strategy of rotating out of public debt investments and allocating capital into private credit opportunities. By targeting private credit, Oaktree can access potentially higher-yielding investments and take advantage of compelling opportunities in the private market. Its main competitive advantage comes from its management expertise and scale as being in the top 12 of the largest BDCs.

## Final Thoughts & Recommendation

Oaktree Specialty Lending Corp. is a well-diversified investment company with a \$3.1 billion investment portfolio diversified across 158 portfolio companies<sup>4</sup>. Its 13% dividend yield provides investors with attractive income. The BDC business model does tend to struggle during recessions, so conservative investors should keep that risk in mind. We estimate total return potential of 23.6% per year for the next five years based on a 10% earnings-per-share growth, the dividend yield, and a valuation tailwind. Shares earn a buy rating.
