Overview & Current Events

Portland General Electric is an electric utility based in Portland, Oregon, providing electricity to more than 930,000 customers in 51 cities. The company owns or contracts more than 3.5 gigawatts of energy generation, between gas, coal, wind & solar, and hydro. Portland General trades on the NYSE under the ticker POR and has a market capitalization of \$4.9 billion. POR has about 3,000 full-time employees. In 2023, the corporation generated \$2.9 billion in revenue. The utility company is diversified by customer, with 37% of retail deliveries going to residential customers, 34% to commercial clients, and 29% to industrial clients. The company is forecasting that 80% of its power delivered to customers by 2030 will be carbon free, and 100% carbon free by 2040.

On April 19th, 2024, Portland General Electric announced a 5% increase in the quarterly dividend to \$0.50 per share.

Portland General reported second quarter 2024 results on July 26th, 2024. The company reported net income of \$72 million for the quarter, equal to \$0.69 per diluted share on a GAAP basis, compared to \$0.39 in Q2 2023.

Retail energy deliveries in H1 2024 decreased 1.5% compared to the same prior year period, but wholesale energy deliveries soared 55%. As a result, total energy deliveries grew 9.4%.

Leadership reaffirmed its 2024 full year guidance for adjusted earnings per share of \$3.08 at the midpoint based on a series of assumptions, most notably a 2.5% increase in annual energy deliveries.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.18	\$2.04	\$2.16	\$2.29	\$2.37	\$2.39	\$2.75	\$2.72	\$2.74	\$2.38	\$3.08	\$3.93
DPS	\$1.12	\$1.18	\$1.26	\$1.34	\$1.43	\$1.52	\$1.59	\$1.70	\$1.79	\$1.86	\$2.00	\$2.68
Shares¹	78.2	88.8	89.0	89.1	89.3	89.6	89.6	89.6	89.6	98.0	103.0	120.0

Portland General has demonstrated a clear history of consistent per share earnings growth. In the past nine and five years, POR has grown adjusted earnings per share by 1.0% and 0.1% per year on average, respectively. In October 2022, management upgraded the company's long-term EPS growth guidance to 5% to 7% (from 4% to 6% previously), but from here we expect 5% earnings growth into 2029. As of July 2024, Portland General maintained that long-term guidance. Leadership also estimates that the company can grow the dividend by 5% to 7% over the long term, for a 6% mid-point, which is consistent with the trailing 10-year average dividend growth rate of 5.8%.

We expect that Portland General will generate this earnings growth through increased annual energy deliveries, as a result of commercial growth as the economy recovers, and strong growth in industrial energy demand due to customer expansion. Rate increases, customer additions, and completion of construction projects will all further fuel Portland General's earnings growth. The company has increased the share count over the last decade, though not at an alarming rate (nearly 2.5% per year over the last nine years). A rising share count is common among utility companies with constant capital expenditures and pay out a large portion of their earnings to shareholders in the form of dividends.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	15.3	17.7	19.1	20.0	18.4	22.3	26.6	24.5	19.1	19.7	15.2	18.5
Avg. Yld.	3.3%	3.3%	3.1%	2.9%	3.3%	2.8%	3.5%	3.4%	3.4%	4.0%	4.3%	3.7%

The current PE ratio of 15.2 is discounted compared to Portland General’s average historical PE ratio. In the past ten and five years, POR has traded at an average valuation of 20.3- and 22.4-times earnings. We estimate the company can grow into the valuation of 18.5 times earnings. This PE ratio increase from 15.2 to 18.5 would result in valuation gains of 4.0% annually due to multiple expansion. With a lower-than-average valuation today, the dividend is elevated historically, at 4.3%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	51%	58%	58%	59%	60%	64%	58%	62%	65%	78%	65%	68%

Portland General’s payout ratio has remained within or below its target payout ratio of 60% to 70% for most of the last decade. Going forward, we estimate that Portland General will likely remain within its target payout ratio as the dividend grows in line with earnings-per-share.

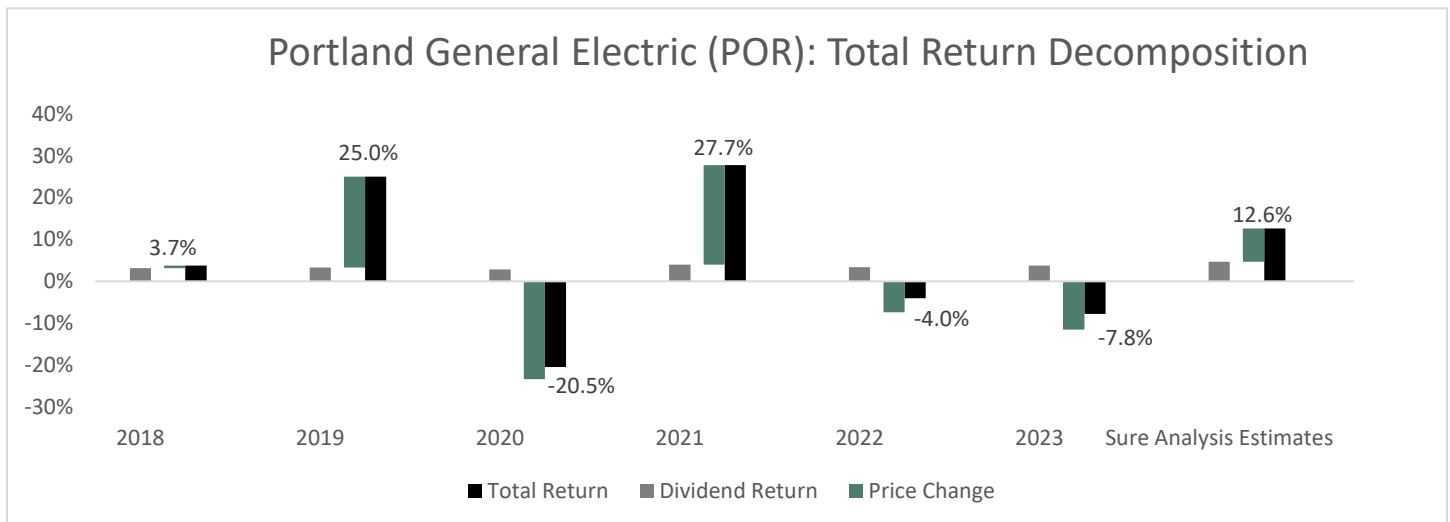

During the great financial crisis, earnings fell roughly 44% from peak to trough, however the dividend was fairly well covered throughout the entire ordeal, and it kept growing year-after-year, resulting in an 18 year annual dividend increase streak. It’s worth noting too that if we ignored the year 2007 where POR generated significantly higher earnings than on average (the peak), the financial crisis had little impact on Portland General’s earnings, which had been rising steadily since 2006.

We don’t see POR as having a significant competitive advantage in its business among its peers, though it does dominate in its geographical area of Oregon, and serves roughly half of the residential population.

Final Thoughts & Recommendation

Portland General Electric is a consistent earnings grower and dominates in its geographical location. The corporation has generally kept within its target payout ratio, which has enabled it to grow its dividend for eighteen consecutive years. We believe Portland General is trading at 82% fair value, with the potential to generate 12.6% in total annualized returns, thus we are reiterating POR at a buy.
