#### Overview & Current Events

The Kimberly-Clark Corporation is a global consumer products company that operates in 175 countries and sells disposable consumer goods, including paper towels, diapers, and tissues. It operates through two segments that each house many popular brands: Personal Care Segment (*Huggies, Pull-Ups, Kotex, Depend, Poise*) and the Consumer Tissue segment (*Kleenex, Scott, Cottonelle, and Viva*), generating over \$20 billion in annual revenue. Kimberly-Clark trades with a market capitalization of \$48 billion and has increased its dividend for 52 consecutive years, making it a member of the extremely prestigious Dividend Kings.

Kimberly-Clark posted third quarter earnings on October 22<sup>nd</sup>, 2024, and results were mixed. The company saw the top line fall 4% year-on-year to \$5 billion, and that missed estimates by \$50 million. Adjusted earnings-per-share fared better, beating expectations by 12 cents at \$1.83.

The company noted higher prices for personal care products. While that boosted profit margins on those products, it also drove consumers to lower-priced alternatives, which is why sales fell. Management noted pricing increases were required in hyperinflationary economies such as Argentina to help offset input and operating costs. Adjusted profit margins rose 90 basis points to 36.7%.

In North America, organic sales fell 1%, which was due to a 3% decline in K-C Professional, and a 1% decline in consumer tissue.

We see \$7.30 in adjusted earnings-per-share for this year after Q3 results, noting offsetting factors in margins and sales as inputs.

#### Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.91	\$2.77	\$5.99	\$6.23	\$6.61	\$6.89	\$7.74	\$6.18	\$5.63	\$6.57	<i>\$7.30</i>	\$9.10
DPS	\$3.36	\$3.52	\$3.68	\$3.88	\$4.00	\$4.12	\$4.28	\$4.56	\$4.64	\$4.72	\$4.88	\$5.92
Shares <sup>2</sup>	365	361	357	351	345	341	339	337	338	337	335	330

While Kimberly-Clark has not meaningfully grown its revenue for years, it has managed to grow its earnings-per-share thanks to share repurchases and its cost reduction programs. With operating margins rising steadily over time, increasing profitability is working to offset somewhat weak revenue numbers. Kimberly-Clark's management team has continuously extended this initiative, aiming for another \$1.5 billion of cumulative savings over the three-year period. This will be a primary growth driver in the upcoming years, particularly as revenue growth topped out after 2020 results. We expect 4.5% annual earnings growth in the years to come, as we expect volumes to remain largely steady over time. We note that the massive price increases the company has seen recently aren't sustainable, and the company is lapping a difficult period for pricing power in 2024, introducing a potential growth headwind.

#### Updated October 25th, 2024, by Josh Arnold

Management has publicly stated targets of mid-single-digit growth in adjusted earnings-per-share annually, -1% to +3% organic sales growth, and dividend growth in-line with earnings-per-share growth. The company's cost saving programs have worked nicely up to this point, but we note that there will be a point when returns from these cost cuts diminish.

We see the dividend rising from the current payout of \$4.88 to \$5.92 as the company continues with slow rates of earnings growth and a relatively high payout ratio.

## Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	28.1	40.6	21.2	19.9	16.7	18.8	18.3	21.7	24.1	18.5	18.8	18.0
Avg. Yld.	3.1%	3.1%	2.9%	3.1%	3.6%	3.2%	3.0%	3.4%	3.4%	3.9%	3.6%	3.6%

Excluding outlier years, Kimberly-Clark has traded at an average price-to-earnings ratio of about 18 over the last decade. This is in-line with its consumer staple dividend-paying stock competitors over the past few years but is lower than the current price-to-earnings multiple of 18.8. With the valuation ahead of our estimate of fair value, we see a slightly negative impact on total returns. The yield is 3.6%, which is roughly equal to most of the last decade. We forecast the yield remaining about where it is over time.

### Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	86%	127%	61%	62%	61%	60%	55%	74%	82%	72%	<i>67%</i>	<i>65%</i>

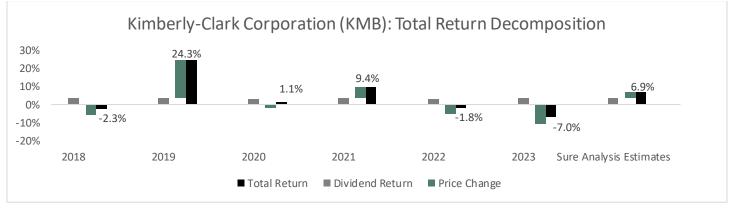

What stands out about Kimberly-Clark's quality metrics is its debt. The company maintains far more leverage than many of its peers in the large-capitalization dividend space. We believe its balance sheet is sound despite the high debt levels that it maintains; we also do not see any meaningful effort by management to reduce leverage at this point, particularly since so much of the company's cash is spent on the dividend payment. However, given its very stable earnings, its ability to service debt is also highly predictable.

Kimberly-Clark's competitive advantage is in its longstanding dominance with a variety of its brands, which are well known in the marketplace. It should also perform well during recessions as most of its products are consumable staples, which was evidenced during the COVID recession.

### Final Thoughts & Recommendation

Kimberly-Clark's total return outlook has risen slightly since our last update. We forecast 6.9% total annual returns, consisting of the current 3.6% yield, 4.5% earnings growth and a 0.8% headwind from the valuation. The stock earns high marks for its dividend history, current yield, and stability, but growth and valuation remain concerns. We reiterate the stock at a hold rating as not a great deal has changed.
