#### **Overview & Current Events**

Canadian Imperial Bank of Commerce is a global financial institution that provides banking and other financial services to individuals, small businesses, corporations and institutional clients. CIBC is focused on the Canadian market. The bank was founded in 1961 and is headquartered in Toronto, Canada. If not indicated otherwise, all numbers in this research report are in U.S. dollars.

CIBC reported its fiscal Q1 2025 earnings results on 2/27/25. For the quarter, the bank's revenue climbed 17% year over year ("YOY") to C\$7.3 billion. Provision for credit losses ("PCL") was C\$573 million, down 2% from a year ago. Naturally, the loan loss ratio was 0.31%, down from 0.36% a year ago. And net income came in C\$2.2 billion (up 26%). Adjusted net income came in 23% higher at C\$2.2 billion. Ultimately, adjusted earnings per share ("EPS") rose 22% to C\$2.20. The adjusted return on equity was 15.3%, up from 13.8% a year ago. The bank's capital position remains solid with a Common Equity Tier 1 ratio of 13.5%, up from 13.0% a year ago. The net interest margin was flat at 1.50% compared to a year ago.

After leading the bank for over 10 years, CEO Victor G. Dodig will be retiring in October, and Harry Culham, the head of the bank's capital markets will take over the CEO role in November. We maintain our fiscal 2025 EPS estimate at US\$5.53.

#### Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$7.06	\$7.67	\$8.62	\$9.19	\$9.04	\$7.53	\$11.28	\$5.25	\$4.96	\$5.27	<i>\$5.53</i>	<i>\$7.06</i>
DPS	\$3.45	\$3.58	\$3.88	\$4.13	\$4.21	\$4.32	\$4.64	\$2.52	\$2.55	\$2.67	\$2.71	\$3.46
Shares <sup>1</sup>	397	397	439	453	446	447	451	906	931	942	940	987

In May 2022, the big Canadian bank stock had a two-for-one stock split, which is why its EPS and dividend-per-share ("DPS") appear much lower in 2022 in the table above. Stock splits do not change the valuation of the stock. The Canadian bank's goal is to grow adjusted EPS by 7-10% per year over a 3- to 5-year period under a normal cycle. However, its earnings and dividends have been bumpy due partly to the foreign exchange fluctuations between the U.S. dollar and the Canadian dollar.

From 2015 to 2024, the bank increased its EPS and DPS by 4.6% and 4.9%, respectively, per year in US\$. Fiscal 2020 was one of those abnormal years with a pandemic triggering a decline in CIBC's earnings. For the bank, one key area of growth is its loans and deposits portfolio. The increased loan book leads to higher net interest income, which is a key source of CIBC's revenues. CIBC's fiscal Q1 2025 deposits and loans and acceptances, rose 8.0% and 5.3% YOY, respectively. The bank's medium-term target for its EPS growth is 7-10% annually. We project a more conservative EPS and DPS growth rate of 5.0% through 2030.

### **Valuation Analysis**

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	10.8	10.1	9.9	10.3	9.2	8.9	10.9	10.0	8.3	10.0	10.3	9.8
Avg. Yld.	5.1%	4.5%	4.1%	5.5%	5.1%	6.0%	4.0%	4.8%	6.0%	5.5%	4.8%	5.0%

CIBC tends to trade at a lower valuation. From fiscal 2015 to 2024, its price-to-earnings averaged 9.8, while its yield averaged 5.1%. From 2020 to 2024, its P/E averaged 9.6, while its dividend yield averaged 5.3%. We think a target P/E of 9.8 is reasonable. The bank stock appears to be fairly valued at current levels. Its yield likely won't stray far away from the 5% range in the long run. As a Canadian stock, CIBC's dividends may be subject to a 15% dividend withholding tax for U.S. investors. This can possibly be avoided by holding in CIBC in a retirement account.

# Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	49%	47%	45%	45%	47%	57%	41%	48%	51%	51%	49%	49%

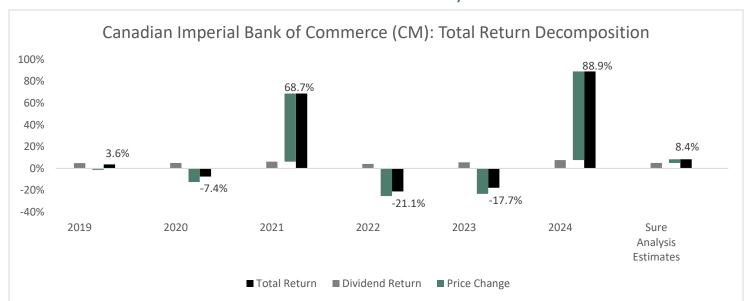

During the last financial crisis that triggered a recession in 2008/2009, the bank stock increased its dividend every year (in the local currency of Canadian dollars), except for fiscal 2009 and 2010 in which it maintained the dividend. The regulator stepped in to be prudent of the potential economic earthquake at that time. During that period, CIBC's adjusted EPS fell about 31% from fiscal 2007-2009 before recovering and having a nine-year run through fiscal 2018. In 2020, CIBC experienced an adjusted EPS decline of 19%.

CIBC is the fifth largest bank in its main market, Canada. Due to a focus on consumer banking, and especially mortgages, which usually are insured in Canada, CIBC has a relatively low-risk portfolio relative to other banks in a normal market. CIBC's performance in the last financial crisis was not good, but also not as disastrous as that of many of its North American peers.

# Final Thoughts & Recommendation

We forecast 8.4% in total returns annually over the next five years, consisting of a yield of 4.8%, 5.0% earnings-per-share growth, and a 0.9% headwind from a price-to-earnings ratio compression. We maintain a hold rating on CIBC stock.
